

PASMA Low Level Access Course

This course is for users of low level prefabricated access equipment.

The programme will cover low level access products below 2.5m, such as podium steps, folding room scaffolds and wide area low level access towers.

The course incorporates theory and practical sessions, with assessments and will instruct candidates to be competent to assemble, dismantle, use, move and inspect low level prefabricated access units.

On successful completion candidates are issued with a PASMA photocard and certificate, valid for 5 years.
